

Dear Valued Customer,

Central Biomedica, Inc. (CBI) & Sera Inc.'s products, including Oral & IV Equine IgG and animal serum derivatives, are manufactured using non-pathogenic organisms or materials which are not toxic or hazardous in nature. The products do not pose harm to the user's safety thus a Safety Data Sheet (SDS) is not required per Title 29 of the Code of Federal Regulations (CFR), 1910.1200.

In ordinary use of our biological products, the materials would not be directly contacted; this, however, is in order to protect the integrity of the product rather than as a user safety precaution. Actual contact with the material due to damaged packaging or incident would not be harmful to the user's safety.

In summary, animal serum products manufactured by CBI represent no health hazard and do not fit into any other class of physical hazard for which an SDS would be required. Use of an SDS format to convey this information could obscure the essentially harmless nature of these products. CBI has provided this letter for use in place of an SDS form.

Should you have any questions or concerns, you may contact us using the information detailed below:

Telephone: 913-541-0090

Email: nicolegreen@centralbiomedica.com

Fax: 913-541-1712

Mail: 9900 Pflumm Unit 61 Lenexa, KS 66215

Thank you,
