WHAT VETS ARE SAYING ABOUT THERA-PAW

"I see two primary applications for Thera-Paw: Post-surgery to protect the bandage and the foot, and post-bandage removal to protect the vulnerable site and prevent re-injury ... I think this product is also useful for corns, where either surgery has failed or the owner has declined surgery ... Thera-Paw is well made with no internal seams to reduce rubbing ... And is well-tolerated ... It provides good overall protection, padding, and support."

Christopher Hunt, BVSc, Diplomate ACVS
The Animal Emergency and Referral Center
West Caldwell, NJ

"Can be used as an alternative to surgery for sesamoid bone fractures ... Is useful as a surgical bandage following corn removal, and is useful for the prevention and recurrence of corns ... And Thera-Paw is easy to slip on and off."

Sean Aiken, DVM, MS, Diplomate ACVS
The Animal Medical Center
New York, NY
