Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Contains Medium Chain Triglycerides (6-20% of fat), a source of fat which is easily digested and absorbed to provide readily available energy

Contains prebiotics aleurone (dry) and inulin (wet) - soluble fibers that help nourish beneficial microflora to promote a healthy GI tract

- Colostrum (dry) helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems

General Health:

- High in antioxidant Vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

†Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.
