Gastrointestinal Health and Food Sensitivities:

Formulas contain hydrolyzed protein sources and have a formula average molecular weight of 11,671 daltons or less to reduce the risk of allergic reaction

Single low-allergen carbohydrate source (corn starch) to help minimize the risk of an allergic reaction

Highly digestible to promote optimal nutrient absorption

- Contains Medium Chain Triglycerides (22 - 26% of fat), a source of fat which is easily digested and absorbed to provide readily available energy
- Contains Omega-6 fatty acids, Vitamin A and zinc to maintain and protect the skin barrier

General Health:

- Contains antioxidant Vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients (Vegetarian):

†Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.
