Flammability of the product: Contact with combustible material may cause fire. This material increases the risk of fire and may aid combustion. In a fire or if heated, a pressure increase will occur and the container may burst.

Suitable Extinguishing Media: Dry chemical, CO₂, water spray (fog) or foam.

Hazardous combustion products: Decomposition products may include the following materials: carbon oxides.

Special exposure hazards: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special Fire Fighting Procedures: Firefighters must wear NIOSH/MSHA approved positive pressure self-contained breathing apparatus with full face mask and full protective clothing.

6. Accidental release measures

Spill and Leak Procedures: Wear proper protective equipment as specified in the protective equipment section. Wipe, scrape, or soak up spill in an inert material for disposal. Wash walking surfaces with detergents and water to reduce slipping hazard. Observe government regulations.
