

GI BALANCE PRO

GI Balance Pro supports digestion, gastrointestinal comfort, regularity and immune health in dogs and cats.

GI Balance Pro is a synbiotic supplement recommended for daily use, as well as during times of increased stress, such as traveling, kenneling and training. It is ideal for pets with digestive disorders and to support normal bacterial balance after antibiotic therapy.

GI Balance Pro:

- » Provides 1 billion CFUs of probiotics per chew
- » Includes the soluble fiber benefits of FOS
- » Is a highly palatable chew for dogs and cats
- » Contains a highly stable probiotic species called GanedenBC³⁰® (*Bacillus coagulans*)

About Probiotics:

Probiotics are beneficial microorganisms that help control the critical balance in the digestive system. They prevent the growth of undesirable microorganisms. Balance within the digestive system is essential to maintain a healthy GI tract, protect against disease, improve digestion and enhance overall health. Microflora also reside in other areas where mucous membranes are exposed to the environment, such as the skin, respiratory tract and genital-urinary tract.

Benefits of probiotic treatment for dogs and cats:

- » Assists in digestion, absorption and regularity
- » Prevents undesirable strains of bacteria from growing to a population large enough to cause health challenges
- » Supports a healthy immune system

About FOS (Fructooligosaccharides):

FOS are prebiotic fibers that support the growth of beneficial bacteria in the intestinal tract. Prebiotics have been shown to inhibit the growth of harmful bacterial species. Because FOS is not digested by the body, it will increase the amount of material in the intestinal tract and stimulate the elimination process to support regularity.
