Safety Pressure Relief Valve

A revolutionary advance in anesthesia safety.

This patented pressure relief valve virtually eliminates the danger of over-inflating a patient's lungs.

With just a press of the pressure regulating button, you can instantly restrict the pressure to a safe level, while effectively ventilating the patient. ***Safety for you and your patients***

FEATURES:

- Impossible to leave closed while unattended
- Normal pressure relief at 20-25 cmH2O using ventilation button
- Less than 1 cmH2O pressure at full open
- Less than 1 cmH2O pressure at full closed
- Replaces any valve with 3/4-20 thread (the industry standard thread size)
- Proven life saving patented design
- 19mm hose connection
- 10-25 cmH2O pop-off pressure
- Can be used with a ventilator
