

# Can you

Google **SEARCH** 

# your pet?

**SaveThisLife.com**  
Microchip & Recovery System

Save This Life has patented a way to use a Google™ search to help you find your lost pet! When someone finds a pet and performs a Google search of the microchip number, they can then privately contact the pet owner via text and email. The pet owner receives a GPS map of where the person who found their pet is located!
